

## **Opportunities And Prosperity On A Scale We Could Never Have Thought Possible**

To provide the well being of the human race with a continual supply of sustenance, good company and prosperous commerce. The sun has for countless eons provided sufficient energy to ensure there is a cyclical ecology, capable of sustaining life on the planet. For genuine good company, the family tradition which comprises a father, a mother, sons or daughters, has for multiple eons provided a reproductive cycle with ethical values. Whereby entire communities and the world as a whole, is stable and socially civilized. For commerce, gold's constant monetary wealth has for eons past ensured that every aspect of the economy, is stable and has a long lasting regenerative cycle of prosperity.

These are the physics of a sphere, which naturally apply to the ecology, to civilization and the economy. The value of the sun, the value of the family and the value of gold are inviolable, as they apply to all human life. They are the passive principles, which act as a stable anchor in the active regenerative cycle. These passive principles being inviolable, are sufficient to maintain the correct ordering of the world's ecology, civilization and economy.

*"The sun with all the planets around it and depending on it, can still ripen a bunch of grapes as though it had nothing else in the Universe to do".*

- Galileo.

With our totally unnecessary ideologies, we have developed a bureaucratically enforced world of countless laws, rules and regulations. It has allowed impersonal commercial corporations to engage in the genetic engineering of plant seeds. That sterilize and destroys the plant's natural reproductive cycle. It has allowed aloof politicians to engage in social engineering the family tradition. That has interfered and helped to destroy the ethics of family values, which maintains the naturally reproductive social cycle. It has allowed interlinked central banks to unnaturally engage in the financial engineering of unsound money. That has interfered with and destroyed, the entire natural reproductive economic cycle. It has meant that the influence of the sun, the family and gold, which for eons adequately provided a regenerative cycle of genuine sustenance, genuine company and genuine prosperity, have been sidelined.

Perhaps the major unintended consequence from our 'World System' based on ideology, is that it creates a lopsided, two-tiered top down society. It gives the administrators of these isms disproportionate powers, disproportionate wealth and disproportionate privilege. Who consequently use this to implement numerous bureaucratic laws, rules and regulations, which impose social and economic tyranny. It can even be a 'thought crime' to question or criticize those who out of a self-important hubris, have chosen to be the final authority on an ism. It is evident that the world system of ideologies has an inbuilt downward spiral. Where throughout history, ethics and economic integrity progressively move from being sub standard to unscrupulously corrupt, before another contrived era of bureaucratic tyranny is formulated.

*"There is no need to try to convert men who define by generalizing and cannot make room for distinctions, just in order to have such fellows for our company in very subtle and delicate doctrines.*

*Besides with all the proofs in the world, what would you expect to accomplish in the minds of people who are too stupid to recognize their own limitations? "*

- Galileo

If a healthy plant is deprived of nourishment for an extended period of time, the plant together with its seed will shrivel and prematurely die. When genetic engineering, military engineering, social engineering and financial engineering interrupts the natural cycles for the ecology, civilization and the economy. With no function to fulfill, the natural cycle is obliged to terminate and this leads to a death cycle. The spheres for the ecology, civilization and the economy are normally measured in hundreds if not thousands of years, which mean the death cycle appears to degenerate slowly.

It seems that a bio engineering misadventure, has most likely hastened the end of the already decaying economic and social cycle. Within a short period of time, the economy and the way we socially interact has dramatically changed for the worse. Despite hysterical political and media rhetoric, each country is equally culpable. All of the competing major powers engage in these reckless laboratory facilities, usually as military research for bio weapons. When they hypocritically do not want to appear to be directly involved in developing such horrific bio weapons, they are known to willingly share laboratory funding with countries that do.

There is no real panacea for engineering, whether it is a viral pandemic, military destruction of a stable country, crony finance, corrupting the morals of children or poisoning bees, birds and insects. Abhorrent genetic engineering is how the ecology dies. Abhorrent military and social engineering is how civilizations die. Abhorrent financial engineering is how a prosperous economy dies.

When there is the assurance of perpetual solar energy, to cater for our ecology. The assurance of perpetual caring family values, to cater for our emotional stability. The assurance of the perpetual monetary wealth of gold in the nations treasury, to provide debt free funding that can cater for our economic prosperity. With opportunity and prosperity on a scale, which we could never have thought possible. The world has more than a super abundance of wealth, to provide for the enduring needs of every individual person.

*“Basic principles and fundamentals must be secure, firm, and well established, so that we can build confidently upon them.”*

- Galileo

To return humanity to its rewarding and fulfilling roots in the ecology, the family unit and prosperous commerce. We must alleviate the current level of economic pressure and social distress. There is no reason why the principles, which ensure everything can naturally regenerate should not be followed and debt cancelled.

However due to the fictional ideology of monetarism, which has financed the ideologies of corporatism, capitalism, globalism, socialism and militarism. The leveraged imbalance of derivatives, the trillions of public assets acquired by central banks. The importance of healthcare and other essential services. Some insightful thoughts on how to structure a completely equitable economic reset. That complies with Sir Isaac Newton's extraordinary third law of physics: *“for every action, there is an equal and opposite reaction.”* Are developed in the author's book Two World Systems.

Metaphysically as well as mathematically, the spherical Universe contains the infinite sum of all possibilities. Energy which is the life force of everything, revolves within the sphere in a perpetual cycle of renewal and change. When this active principle conjoins with a stable passive principle, it gives rise to both motion and emotion. The dimension and harmony necessary, to balance every human need!

With such a comprehensive ethical understanding, humanity rightfully enjoys the calm assured confidence and freedom, of a flourishing economic and emotionally dignified world. A world that is emancipated, from political and financial control over every aspect of our lives. Released from the abhorrence of debt finance, taxes on productive

effort, endless wars and the schizophrenic ideologies that divide society. In a circular world, in every wonderful sense and meaning of the word circular. Continuing with these degrading and ruinous impositions, is totally pointless. As our understanding of the science of perpetual circular motion expands, it will invigorate a truly astounding renaissance in our systems of education, arts, music, societal well-being, commerce, enterprise and all of the sciences.

Galileo was an eminently renowned scientist during the Florentine renaissance. He was court mathematician to the ruling Medici family, a famed inventor, engineer, astrologer and professor for advanced mathematics in Pisa University. In a show trial that was designed to publicly disparage his person and to end any dialogue on the science that would revolutionize the world. The religious inquisition used an extremely dubious trumped up charge to change the narrative of his trial, from his proven science to their religious ideology. Galileo was sentenced, to life imprisonment and his published work was banned. It has meant the revelation in Galileo's 'Dialogue Concerning the Two Chief World Systems,' whether from neglect or just a lack of comprehension. Its significance has lain unexplored for almost four hundred years.

*"I think that in the discussion of natural problems we ought to begin not with religion, but with experiments and demonstrations."*

- Galileo

Mankind has an urgent decision to make, it is between science and ideology. Do we want the world we live in to function completely harmoniously, in synchrony with the energy of the Universe? Or do we want the world system of invented ideologies, that mandates the establishment to use the bureaucracy of engineered force.

It should be apparent that the establishment in the deep state have succeeded in grossly distorting, perverting and mismanaging everything they touch. How the final end game unfolds can be deduced, from horrific sanctions and propaganda against defenseless oil resource rich nations. It also explains the unrelenting erosion of our personal privacy, freedoms, family ethics and commerce. This decay is set to become even more obvious, in the aftermath of the terrible viral pandemic. When we ask, what is the next big thing

they will think up? It is the same despicable storyline, which is repeated every time. The engineered transfer of the earth's vast wealth resources, to a few oligarch insiders. By shattering the lives and aspirations, of the great body people on the planet.

We need the presence of mind, to finally say enough is enough and bring to an end the charade of believing in ideologies; and trusting the integrity of the 'deep state' political, corporatist, financial, militarist and religious establishment. It has brought the world closer to the brink of total disaster, than any time in history.

Two World Systems compares and contrasts two systems that can be applied to the world. The ideological belief-isms that have created a lop sided, two-tiered system based on bureaucratic control and fake finance. Plus a system that completely revolutionizes our way of life. It is the physics of spherical fact, which applies to the ecology, society and the economy. With opportunities and prosperity, that are on a scale we could never have thought possible. Its beauty, complexity, symmetry and dimension has been exquisitely illustrated by Da Vinci and with absolute assurance, scientifically formulated by Copernicus and Galileo. In addition based on the Tibetan Wheel of Life tangka pictorial, there is truly remarkable knowledge, which will resolve many other hidden mysteries. Two World Systems by David Bryan is available on [Kindle Books](#).
